

# SID4 Bio

**Product/Model: SID4**

**Bio/ VIS - NIR (400 - 1100 nm)**

**Product Overview:** The SID4 Bio is a plug & play camera for quantitative phase imaging. It works with any optical microscope and enables measuring valuable numerical parameters on living cells and many more transparent samples.

## Key Features

Unique technology for instantaneous artefact-free quantitative phase imaging

Compact and plug and play

Easy to integrate - robust design

## Applications

- Material inspection • Quantitative Phase Imaging •

## Specifications

### SID4-BIO

|                                     |  |
|-------------------------------------|--|
| <b>Wavelength range</b>             | 400 - 1100 nm (compatible with white-light source, laser...) |
| <b>Magnification</b>                | 10x to 200x  |
| <b>Aperture dimension</b>           | 9.98 x 8.64 mm <sup>2</sup>                                  |
| <b>Phase and Intensity sampling</b> | 416 x 360  |
| <b>Lateral resolution</b>           | Depends on magnification-Down to 0.2µm on phase image×120    |
| <b>Resolution (Phase)</b>           | < 2 nm RMS   |
| <b>Acquisition rate</b>             | 10 fps   |
| <b>Dry mass resolution</b>          | < 0.5 pg   |
| <b>Microscope interface</b>         | C-mount  |
| <b>Dimensions</b>                   | 80 x 77.5 x 86.4 mm <sup>3</sup>                             |
| <b>Interface</b>                    | Giga Ethernet  |
| <b>Weight</b>                       | ~ 450g   |
