

Software suite

Product Introduction: Every Phasics wavefront sensor is delivered with its expert software. The Phasics software suite covers applications in laser testing, adaptive optics, optical metrology and quantitative phase imaging.

Key Features

Expert software relying on more than 15 years of user feedback
Windows and Linux SDK library available
User friendly

Applications

- Laser testing, adaptive optics, and plasma diagnostics
- Optics metrology and optical system alignment
- Material inspection
- Quantitative Phase Imaging

Specifications

Software suite

Work in real-time	Yes
Automatically updated	Yes
SID4 software	Laser measurement and optical system alignment
OASYS software	Add-on for deformable mirror control
Kaleo software	Optics and surfaces testing
SID4 Bio software	Quantitative Phase Imaging
