

Pulsar

Extreme Pulse Control & Tunability

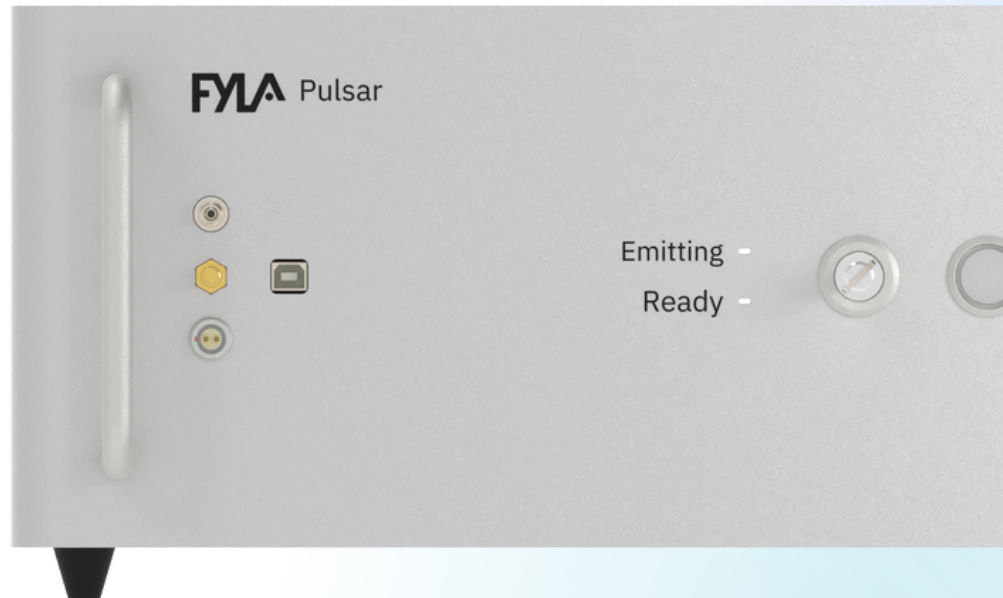

Pulsar is a complete laser system enabling extreme pulse control and tunability, offering the user an unmatched level of versatility. With the independent adjustment of three key parameters: repetition rate (MHz to 1 Hz), pulse energy (10 pJ to 10 nJ), and pulse width (300 to 600 fs).

Pulsar is an ideal laser for nonlinear optics applications, especially two-photon and three-photon absorption spectroscopy and microscopy.
